

Fe Amino Chelate 510

Guaranteed Content (w/w):

Chelated Fe: **5%**

Free Amino Acid: **10%**

Organic Matter: **10%**

 **Physical Appearance:**
Soluble Liquid

Suitable for:

-  **Fruits**
-  **Vegetables**
-  **Field Crops**
-  **Greenhouses**

Registration No: 45711

Producer: Bazargankala Co.

Glycine Chelated Foliar Fe I Better Resistance to environmental stresses I Better greenness

Introduction:

Nutritech Amino Chelate Fe 510 contains Fe chelated with glycine amino acid and organic matter.

Technical Information:

Content			
Nutritech Amino Chelate Fe 510	Chelated Fe	Free Amino Acids	Organic Matter
	5 %	10 %	10 %

Nutritech Amino Chelate Fe 510 is a Fe chelate which is absorbed quickly by different plants. One of the main benefits of this fertilizer is its high mobility inside plants, so after the absorption it can be relocated to the organs with low Iron concentration. This fertilizer is recommended for all field crops, fruit trees, vegetables and greenhouse crops.

Application Guide: Foliar application

Crops	Time of Application	Application Rate
Fruits	Early fruit formation, during the fruit development	1-3 liters/ 1000 L of water
Citrus	Before flowering, early fruit formation and during the fruit development	2-3 liters/ 1000 L of water
Field Crops	Early growth season	1-2 liters/ 1000 L of water
Vegetables	Early growth season, Before flowering	2-3 liters/ 1000 L of water
Greenhouses	Before flowering and after fruit setting	1-2 liters/ 1000 L of water

* Repeat as needed

Fe

Amino Chelate 510

Features & Advantages:

- Quickly eliminating chlorosis (yellow leaf) caused by Fe deficiency
- Increasing plant stability against environmental stresses due to the presence of amino acids
- Improving the quality and increasing the yield
- High absorption rate and easy transfer to the target organs in the plant

Cautions & Disclaimers:

- The dosage and recommendations above are general. In order to be exact and most effective, soil and tissue analysis should be considered and also consultation of local experienced agronomists is highly recommended.
- To avoid any misuses, jar test and small- scale testing is recommended before main application.
- The liability of the producer is limited to the guaranteed content and physical characteristics as claimed; the producer shall not be liable for anything out of its control.
- This product is NOT miscible with alkaline solutions, Sulfur products and pesticides and shall not be mixed with the mentioned products.
- The product shall be kept in 5-30 degrees centigrade and also NOT under the direct sunlight and away from flammable materials.
- Foliar application shall be applied in the coolest time of the day during the day time (early morning or near sunset).
- The product should be applied as foliar mixture, so undiluted use of it is prohibited.
- Use acceptable quality of water for foliar application.
