

## K60

Guaranteed Content (w/w):

**K<sub>2</sub>O: 60%**

**Free Amino Acid: 5%**

 **Physical Appearance:**  
**Soluble Liquid**

**Suitable for:**

 **Fruits**  
 **Pistachio**  
 **Citrus**  
 **Vegetables**  
 **Field Crops**  
 **Greenhouses**

**Registration No: 61488**

**Producer: Bazargankala Co.**

## K<sub>2</sub>O + Amino Acids | High Potassium Fertilizer, Improving Quality; Better Resistance to Environmental Stresses

### Introduction:

“**Nutritech K60**” Contains high percentage of Soluble K that resolves K deficiency; it also increases the absorption of potassium due to free amino acids and moreover acidic pH; also for all the points mentioned it improves quantity and quality of products such as better maturation, coloration and brix.

### Technical Information:

Content		
Nutritech K60	K <sub>2</sub> O (W/V)	Free Amino Acid (W/V)
	60 %	5 %

Considering the need of the plants and also Iran's soil conditions, using K fertilizers with high leaf absorption helps the plants produce better fruits, this need is higher especially in the generative stages of growth.

In addition to what has stated, having free amino acids enhances plant's resistance to adverse climatic situations.

### Application Guide: Foliar Application

Crops	Time of Application	Application Rate
Fruits	After fruitsetting to harvest	1-2 liters/ 1000 L of water
Field Crops	After flowering to harvest	
Cereals	After tillering to harvest	
Pistachio	Filling Stage	
Vegetables & Greenhouses	In the middle of growing season to harvest	

\* Repeat as needed

## K60

### Features & Advantages:

- Fast elimination of potassium deficiency
- Crop uniformity
- Better taste, color and marketability
- Increasing brix

### Cautions & Disclaimers:

- The dosage and recommendations above are general. In order to be exact and most effective, soil and tissue analysis should be considered and also consultation of local experienced agronomists is highly recommended.
- To avoid any misuses, jar test and small- scale testing is recommended before main application.
- The liability of the producer is limited to the guaranteed content and physical characteristics as claimed; the producer shall not be liable for anything out of its control.
- This product is NOT miscible with Copper, Chlorine, Acidic compounds solutions, Calcium products and pesticides and shall not be mixed with the mentioned products.
- The product shall be kept in 5-30 degrees centigrade and also NOT under the direct sunlight and away from flammable materials.
- Foliar application shall be applied in the coolest time of the day during the day time (early morning or near sunset).
- The product should be applied as foliar mixture, so undiluted use of it is prohibited.
- Use acceptable quality of water for foliar application.
- Shake well before application.
