

Seed Treatment 1010

Guaranteed Content (w/w):

| Total Nitrogen | 2% |
|-------------------------------|-----|
| Organic Nitrogen | 2% |
| P ₂ O ₅ | 10% |
| K ₂ 0 | 6% |
| Zinc | 10% |
| Humic Acid | 3% |
| Organic Matter | 18% |

Physical Appearance: Suspension/ SC

Special Weight (18-20 C°): 1.30 ± 0.05 Kg/L

Suitable for:

Vegetables

₹ Field Crops

Registration No: 67614

Producer: Bazargankala Co.

Containing Phosphorus, Zinc, Organic Matter and Humic Acid I Better Rooting, Increasing Germination

Introduction:

"Nutritech Seed Treatment 1010" contains phosphorus, zinc, organic matter and humic acid. Treating seeds with this fertilizer before planting improves root system and increases rate of germination. It not only reduces the effect of transplantation stress, but also improves the early seedling establishment. Use of this liquid fertilizer will increase the quantity and quality of products. Also, due to its suspension formulation, this composition creates a suitable coating on the seed.

Technical Information:

| Content | | | | | | | | |
|-------------------|-----|-------------------|---------------------|-------------------------------|------------------|------|---------------|-------------------|
| Seed | | Total Nitrogen | Organic Nitrogen | P ₂ O ₅ | K ₂ O | Zinc | Humic Acid | Organic Matter |
| Treatment 1010 | w/w | 2 % | 2 % | 10 % | 6 % | 10 % | 3 % | 18 % |
| | w/v | 3 % | 3 % | 13 % | 8 % | 13 % | 4 % | 23 % |

This compound leads to better germination and uniformity. It will also help reduce possibility of damage caused by damping off and root diseases, because of better and stronger root growth.

Application Guide: Seed Treatment*

| Crops | Application Rate |
|-------------------------------------|--------------------------------------|
| Cereal | 3-4 liters per 1 metric ton of seeds |
| Legumes | 4-5 liters per 1 metric ton of seeds |
| Industrial crops and Oil seed crops | 3-4 liters per 1 metric ton of seeds |
| Vegetables | 1-2 liters per 100 Kg of seeds |

^{*}Dilute each liter of this product in maximum 2 to 5 liters of water, then mix it with the seeds until they are uniformly covered. When seeds are dried under shade, they are ready to be planted.

Features & Advantages:

- Increasing seed germination
- Developing root system and increasing water and nutrient absorption
- Better establishment of seedling at the beginning of growth
- Increasing products quality and yield

Seed Treatment 1010

Cautions & Disclaimers:

- Should it be mixed with any other materials, jar test and small- scale application are highly recommended.
- The dosage and recommendations above are general. In order to be exact and most effective, soil and tissue analysis should be considered and also consultation of local experienced agronomists is highly recommended.
- The liability of the producer is limited to the guaranteed content and physical characteristics as claimed; the producer shall not be liable for anything out of its control.
- The product shall be kept in 5-30 degrees centigrade and also NOT under the direct sunlight and away from flammable materials.
